Money The Bank

Lonesome River Band
Capo 4

```
      G
When we first met I was young and poor
   C                        G
I knew just what I was working for
         G                        D                G
But the times have changed and so have you, I see
               G
Well, I was making money, you were making time
      C                           G
But you can bet I won't stand in line
       G                    D          G
If you leave me it's like money in the bank

            G                          C                        G
So, chalk it up, mark it down, look for me, I won't be around
                  G                  D        G
If you leave me it's like money in the bank

                 G
Well, there's other girls that'll treat me right
        C                          G
And make it home before daylight
          G                   D                    G
They will love me for who I am and not what I buy
                  G
Well, when the cards are down and the table's turned
       C                       G
It will be too late for you to learn
     G                            D          G
My love's worth more than money in the bank
```
