Ride Me Down Easy

Capo on the 2nd fret.

Verse 1:

```
  D                                  G
The highway she's a hotter than nine times the hell
        A                                 D
The rides are as scarce as the rain
                                                  G
When your down to your last shuck with nothing to sell
       A                            D
And too far away from the train
```

Verse 2:

```
  D                                          G
Been a good month of Sunday's and a guitar ago
         A                                 D
Had a tall drink of yesterday's wine
                                        G
Left a long string of friends,some sheets in the wind
               A                        D
And some satisfied woman behind
```

Chorus:

```
    D                                 G
Hey ride me down easy Lord,ride me on down
         A                                D
Leave word in the dust where i lay
                        G
Say i'm easy come,easy go
    A                      D
Easy to love when i stay
```

Verse 3:

```
  D                                          G
I've put snow on the mountain,raised hell on the hill
             A                                D
I locked horns with the devil himself
                       G
Been a rodeo fool,a son of a gun
          A                                D
And a hobo with stars in his crown
```

Chorus.
